

# Die-Cut Overlaminates/Tamper Seals

Die-cut over laminate labels are sized to fit popular dot matrix, thermal transfer and laser label sizes. Liners are backslit for easy over laminate removal.

Die-cut overlaminates are produced in B-103 clear polyester, a good general-purpose and PC board over laminate that withstands high temperatures, dirt, oil and cleaning solvents while displaying excellent clarity. Packaged in rolls of 5,000 or 2,000 depending on label size.

Overlaminates protect bar codes from dirt, oil and abrasion without affecting readability.

## TAMPER SEALS

Handy, red-on-white tamper seal labels are printed on B-351 tamper-evident vinyl material. Designed for sealing access points, protecting adjustments and sealing enclosures, tamper seals are available in two shapes with three different legends.

Brady tamper seals come in 20-page pocket size books. Protect your warranty exposure by sealing access points with tamper seals.
